

Part 1a: Quantitative data collection

Quantitative Session of the 2026 HUSOE ELPS Methods and Data Institute

Nathan Alexander, PhD

Table of contents

1	What data collection entails	2
2	Quantification	2
3	Sampling data	2
3.1	The sample frame	2
3.1.1	Comprehensiveness	2
3.1.2	Probbaility of selection	2
3.1.3	Efficiency	2
3.2	Example: Traditionalist view	2
3.3	Example: Deficit view	2
3.4	Sampling procedures	2
3.5	Example: Traditionalist view	2
3.6	Example: Critical theory	2
3.7	Sample design and estimates	2
4	Storing data	2
4.1	Example: Traditionalist view	2
4.2	Example: Critical theory	2
5	Recommended readings	2

1 What data collection entails

2 Quantification

3 Sampling data

3.1 The sample frame

3.1.1 Comprehensiveness

3.1.2 Probability of selection

3.1.3 Efficiency

3.2 Example: Traditionalist view

3.3 Example: Deficit view

3.4 Sampling procedures

3.5 Example: Traditionalist view

3.6 Example: Critical theory

3.7 Sample design and estimates

4 Storing data

4.1 Example: Traditionalist view

4.2 Example: Critical theory

5 Recommended readings
